

REPAIRING CRACKS & SPALLS IN CONCRETE

using Top 'n Bond Concrete Patcher

Project how-to guide

◆ The Pro's Choice Since 1936

PREPARATION

Mix product according to package instructions.

Using a garden hose, remove any dirt or debris from the crack. For more severely damaged concrete a pressure washer may be needed.

APPLICATION

Place material in the cracked area. This will help ensure a good bond.
**** BE SURE TO WEAR GLOVES ****

Add additional dry material to the mix to increase the consistency. Using a margin trowel, add more product to the damaged area.
