Welcome to
SMOOTHWRAP™

Let's get started on your new drying experience.

Powered by

INFINITI**PRO**
BY CONAIR®

Connect to Power
Gently insert polarized plug in correct orientation into 110-125V AC / 15amp rated outlet.
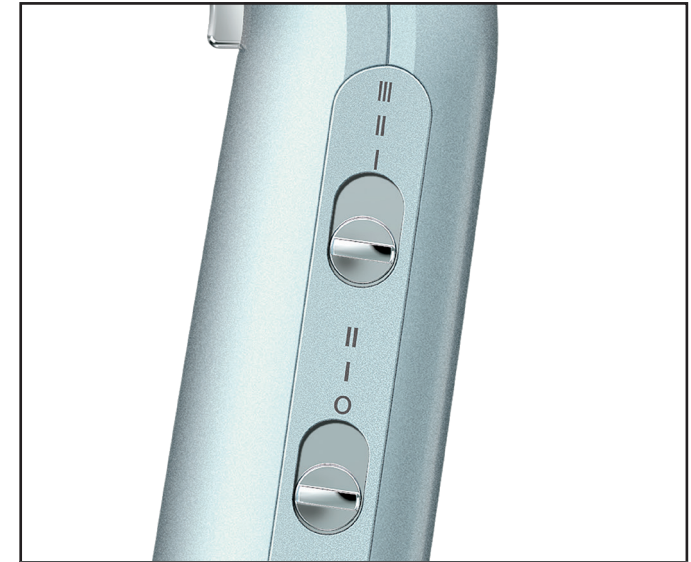

Heat/Speed Switches
Power the dryer on by turning the heat switch to low.
Adjust heat and speed settings for your hair type.
Low(I)/Cool(I) for Delicate & Thin Hair
Low(I)/Warm(II) for Average to Thick Hair
High(II)/Hot(III) for Thick or Wavy Hair
Cool Shot sets style in place

Dual Ionic Technology
The conditioning ions are emitted through the ionic port and outlet grill, and will continuously wrap around your hair through the entire drying process.
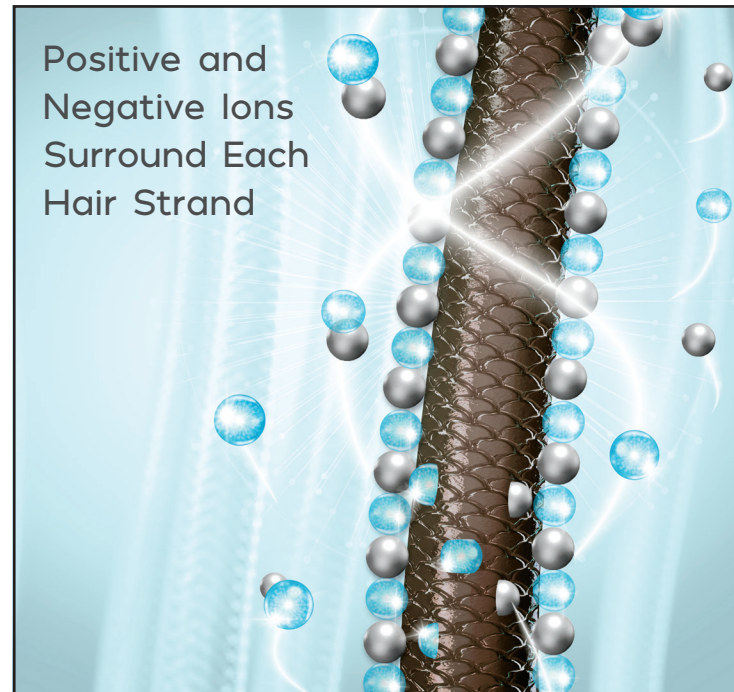

Positive and Negative Ions Surround Each Hair Strand

Ion Balance
Your hair wants the perfect balance of ions.
The SmoothWrap™ helps balance the positive and negative ions surrounding your hair to eliminate frizz and maintain body, leaving your hair feeling moisturized and conditioned.
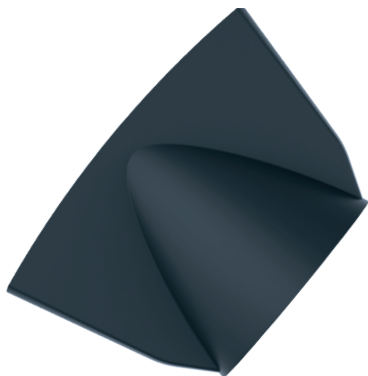

Concentrator

Use the concentrator for smooth, sleek styles. First, partially dry your hair without the concentrator. Then snap it onto the dryer. Section your hair and guide your hair through your brush while directing the airflow right behind from the root, upward.

Diffuser

Use the diffuser for waves and curls. First, partially dry your hair without the diffuser. Then snap it on the dryer. Take a section of your hair and drape it into the diffuser. Start with the low heat setting, and bring the diffuser to your head. Leave your hair undisturbed during the drying process to maximize the curls.

Rear Filter

Remove the filter by gentling rotating it off, and clean it by hand or with a light brush to remove any lint buildup. This will extend the life of your dryer.

Dryer With Line Cord

Store your dryer in a secure, dry location away from children. Do not wrap the cord around the dryer. Instead, loosely fold the cord back and forth in a bundle and secure it with the Velcro® band.
