

## BACK COVER

### 36-CAN LEAK-PROOF WELDED COOLER

Melting ice is the last thing you want to worry about when you're in the woods, on the water or just hanging out in the backyard.

Our Ozark Trail High-Performance Coolers are designed to stay cold longer and keep your ice for days on end.

For best results, pre-chill your cooler with ice the night before use and use block ice which melts slower than standard ice cubes. The fuller your cooler is, the longer its contents will stay cold.

**KEEPS ICE  
FOR UP TO  
3  
DAYS\***

\*This product was 100% filled with ice and the ambient temperatures were alternated between approximately 90°F/32°C and 67°F/19°C every 12 hours to simulate day/night temperatures during the summer. At the 3 day mark, ice was still present. Note: Results will vary according to the ambient temperature, the volume and the starting temperature of the contents.
