VOYAGE & VAULT

EOVATIONS™ TECHNOLOGY

Since its creation in 2007, Eovations™ technology has perfected the substrate found in Deckorators® Voyage™ and Vault™ decking. The unique process starts with a mixture of polypropylene and calcium carbonate that's pultruded, which creates cavitation or tiny air pockets. This keeps the boards lightweight, but with a fiber-like structure similar to wood, giving it unmatched strength.

DECKING PROFILES

Voyage and Vault decking available in:

- 12', 16' and 20' grooved-edge lengths
- 16' and 20' solid lengths
- 7/8" x 5-1/2"

INDUSTRY-LEADING WARRANTY

- 25-year stain and fade
- 25-year structural
- 25-year removal and replacement

WHY EO VATIONS™ TECHNOLOGY?

STRONG

Provides the industry's best strength-to-weight ratio

LIGHTWEIGHT

Nearly 35% lighter than traditional composites and similar in weight to PVC

STABLE

Virtually no thermal expansion or contraction when compared to leading PVC decking

**WATER &
GROUND**

Warranted for installation in or in contact with the ground or water

**ENHANCED
TRACTION**

Voyage decking provides 34% or greater surface traction than other leading brands of composite decking*

*Capped composite decking boards tested by an independent third-party lab in wet conditions under the AS/NXS 4586-2013 standard; decking board were tested on 9/24/18-9/25/18.
