Tension comb 2x

Activating i.d. curl™ sequence

Activate easier curling when you enable your i.d. curl™ sequence in the MyDyson™ app.

Setting up your personalized curl sequence is quick and easy.
It takes under two minutes.

Step 1

Download the MyDyson™ app.

Logos of MyDyson™ app, App store and Google Play.

Step 2

Set up your hair profile and enable i.d. curl™ personalized curling sequence in the MyDyson™ app.

Step 3

Attach a curling barrel to your device. Press the Power button to activate the sequence.

Your Dyson Airwrap Co-anda2x™ multi-styler and dryer will then wrap, style, set and release consistent curls, automatically adjusting heat and airflow based on the best settings for your hair.

MyDyson™ app connectivity

App functionality may vary per market. Requires internet connection. Operating system and mobile device requirements for the MyDyson™ app can be found on the App Store or Google Play.

Apple, the Apple logo and Siri are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of the Apple Inc., registered in the U.S. and other countries. Getting to know your device

Getting to know your Dyson Airwrap Co-anda2x™ multi-styler and dryer

Attachment learning

On first use, your device will default to the best temperature and airflow settings recommended for each attachment.

You can change these as you style, and your device will remember your go-to styling preferences.

Power button

Activates airflow for all attachments and initiates automatic features. (Curling barrels only).

Temperature control

Four heat settings, including constant cold.

Airflow control

Three airflow speeds – high, medium and low.

Bluetooth® wireless technology LED

Indicates the device is connected to the MyDyson™ app.

Flashing blue – connecting.

Constant blue – connected.

Auto LED

Indicates an attachment with automated features is attached, and the automated feature is enabled (Curling barrels only).

With airflow off, you can disable automated features by holding the Power button for five seconds – until the Auto LED lights up. Hold again to re-enable.

The front of the device, starting at the top of the handle: Auto LED then the round Power button and a long and thin Cold shot button. At the bottom of the handle offset to the left the Airflow control LEDs and button, offset to the right the Temperature control LEDs and button. The filter and Bluetooth LED are centered with the Filter cage below the handle.

Cold shot

Shaped for easy recognition. Hold to deactivate the heating element to set your style.

Filter LED

Flashing white – no filter detected
Amber – filter cleaning needed.

If the LED continues to flash amber after the filter has been cleaned, contact the Dyson Helpline.

Removable filter

Easy to remove for cleaning (see the 'Regular filter maintenance' section for details).

Intelligent attachments

Your device will only work when an intelligent attachment is clicked into place.

RFID chips within each attachment communicate with your Dyson Airwrap Co-anda2™ multi-styler and dryer, to instantly adapt to the best temperature and airflow settings recommended for each attachment.

You can change these as you style, and your device will remember your go-to styling preferences.

Attachments click into place at the top of your device's body.

Bluetooth® wireless technology

Bluetooth® wireless technology to connect to the MyDyson™ app.

Connect your Dyson Airwrap Co-anda2™ multi-styler and dryer to the MyDyson™ app to get the best from your device.

A hair profile tailored to you

Answer a few simple questions about your hair type, length and style, for personalized tips and advice.

Faster, easier, more consistent curls.¹

Uses your hair profile to automatically adjust heat and airflow for each stage of your styling sequence. For consistent curls, at the touch of a button.

¹ vs. original Dyson Airwrap™ multi-styler and dryer.

Styling attachments

All attachments easily click into place. When removing an attachment, we recommend holding the cooler edges of the Anti-snap loop brush 2x, tips of the Air straightener 2x attachment, or colored cool tips of the attachments.

	Styling attachment	Heat and airflow presets	Works with Auto feature
	Conical Co-anda2x™ curling barrel Conical shape to achieve a seamless curl pattern from root to tip. Ideal for creating natural looking curls.	High heat High flow	Yes
	1.6" Co-anda2x™ curling barrel Re-engineered to wrap more hair ² to create loose curls and waves in both directions.	High heat High flow	Yes
	Anti-snap loop brush 2x Gives a smoother, more aligned finish. ³ Loop bristles reduce snagging while improving comfort on the scalp. Designed for all hair types.	High heat High flow	No
	Large round volumizing brush 2x Creates voluminous styles with reduced frizz. ⁴ Controlled airflow and tapered bristles allow you to style a section at a time, without disturbing surrounding hair.	High heat High flow	No
	Air straightener 2x attachment Uses high velocity airflow and passive plates, to deliver the tension needed to create straighter styles.	High heat High flow	No
	Fast dryer 2x Transforms into a full performance hair dryer with higher velocity airflow for faster drying. ⁵ Takes hair from wet to dry or pre-dry for further styling.	High heat High flow	No
	Wave+ Curl diffuser 2x 2-in-1 format diffuser disperses airflow in two different ways to enhance your natural curl pattern.	Medium heat Medium flow	No
	Tension comb 2x High-velocity, targeted airflow dries hair fast, while stretching and smoothing curly and coily hair. Additional side bristles increase tension for a straighter finish. ⁵	High heat High flow	No

Your device may not include all attachments listed.

1. vs. Dyson Airwrap i.d.™ multi-styler and dryer. 2. vs. Original 1.6" Co-anda2x™ curling barrel. 3. vs. Dyson Airwrap i.d.™ Soft Smoothing Brush. 4. vs. untreated hair. 5. vs. Dyson Airwrap™ Wide-tooth comb.

Using your attachments

Connecting the attachment

Click attachment into the main body until it fits securely.

Lower the attachment onto the device's main body and turn gently clockwise until it locks into place.

Slide the release button and turn the attachment anti-clockwise using the cool tip or edge, then pull up to remove.

Changing attachments

To change attachment, slide the Release button and remove using the cool tip or edge.

Cool touch tip

During use, the curling barrels and round brush will get hot. To change to another attachment, hold the tip. If the attachment doesn't have a tip, hold the cool edge.

Holding onto the rotating cool tip at the top end of the attachment, slide the Release button and lift the attachment away.

1.6" Co-anda2x™ curling barrel

Large round volumizing brush 2x

Take care when handling hot attachments

Hold the attachment only in the area indicated.

Pre-styling

For straight and wavy hair, use a dryer attachment – Fast dryer 2x.

Hair should look dry but feel cold to the touch before curling with barrels.

For curly and coily hair, use the Anti-snap loop brush 2x. Brush hair downwards in small sections, starting from the ends and working towards the roots, until slightly damp to touch.

Curling

Using i.d. curl™ personalized curling sequence

The Dyson Airwrap Co-anda2x™ multi-styler and dryer remembers your personalized sequence. This tailors wrapping and styling times to your personal hair profile, using the MyDyson™ app.

First, set up i.d. curl™ personalized curling sequence in the MyDyson™ app.

Curling barrels

Step 1

Press the Power button, then take a section of hair and bring the curling barrel towards tips. Hair will start to wrap around the barrel.

Step 2

Move styler towards head, no need to twist. Your personalized i.d. curl™ sequence will start.

Step 3

Cold shot will automatically activate to set the curl.

Airflow will automatically turn off when sequence is complete.

Move device downwards to release.

To change curl direction, rotate the barrel's cool tip.

Shaping

Using Dyson Co-anda 2x brushes

Anti-snag loop brush 2x

After brushing from root to top, curling bristles inwards at the ends of the hair to create shape e.g., J-curls.

Tip

To create shape, turn brush inwards at the ends.
To maintain volume, face bristles outwards.

Large round volumizing brush 2x

With gentle bristles, hair can be rotated around the brush to add volume and bounce.

Straightening

Air Straightener 2x attachment

Styling from wet to dry, first pre-dry your roots with the Fast dryer 2x or Large round volumizing brush 2x.

Attach the Air straightener 2x attachment in the orientation shown.

The clamp handle of the Air straightener 2x attachment should face the rear of your device in order to attach correctly.

Place a section of hair into the attachment with vents facing down, clamp and glide down slowly.

Tip

Slowly move the Air Straightener 2x attachment through a small section of hair to reduce the amount of passes needed.

The cool tips are located at the top of the Air straightener 2x attachment.

Smoothing

Anti-snap loop brush 2x

Use the Anti-snap loop brush from root to tip, increasing tension to pull hair straight.

Tip

For straighter styles, hold the ends of curly and coily hair when smoothing to create more tension.

Volumizing

Large round volumizing brush 2x

The Large round volumizing brush 2x diffuses airflow evenly down the length of the brush, for more controlled styling with less frizz.¹ The tapered bristles pivot to release hair easily as you style.

Tip

Lift sections upwards as you dry to add volume. Wrap hair around and under the brush to shape the ends.

1. vs. untreated hair.

Diffusing

Wave+ Curl diffuser 2x

Dome mode

Detachable prongs are removed, with airflow being drawn into the dome to help enhance and smooth natural waves or curls.

Remove the detachable prongs to use your diffuser in Dome mode.

Diffuse mode

The attached prongs disperse airflow to the roots for textured, voluminous curls and coils.

Attach the detachable prongs to use your diffuser in Diffuse mode.

Stretching

Fast drying

Position attachment's teeth horizontally for a faster dry time, while gently stretching as you move down the section of hair.

Tensioned stretching

Twist attachment so teeth are facing downwards and at a slight angle, so the side bristles touch your hair – for a straighter finish.¹

1. vs. Dyson Airwrap™ Wide-tooth comb.

Regular filter maintenance

Filter cleaning is overdue when the Amber LED starts flashing

Ensure that you unplug your device from the mains electricity supply and allow to cool down before cleaning your filter.

Dyson Airwrap Co-anda2x™ multi-styler and dryer has highly tuned technology to give outstanding performance.

This technology needs to be kept free from dust and hair product residue.

Maintenance is required to maintain performance.

Filter mesh

Filter cage

Step 1

Remove the filter cage by sliding it down the power cord and opening at the split line.

Step 2

Soak the filter in a bowl of water.

Step 3

Wash the filter cage under a warm, running tap.

Step 4

Shake the filter cage to remove the majority of the excess water, then leave to dry completely.

**Step 5**

Open the filter cage at the split line and replace back on to the device. Click into place.
