

CKIT-3-B  
**EXPANSION KIT**

**Installation Instructions**

Area Light

Hub

Wire

**Assemble the hubs** by attaching the smaller black ground stakes.

**Assemble the area light stems** by attaching the brown ground stakes to the path light stems with the screws provided.

Remove the top portion of the fixture, insert the bulb and replace top.

- 1** Turn off the transformer (the green light will go off) and unplug the existing system from the power outlet.
- 2** Assemble the hub by attaching the black ground stake to the hub.
- 3** Assemble the area light by attaching the brown ground stakes to the path light stems with the screws provided.
- 4** Remove the top portion of the fixture, insert the bulb and replace the top.

- 5** Locate the new hub in the center of where the fixtures will be placed and within 25 feet of an existing hub.
- 6** Position the fixtures as desired and run the wire from each fixture to the hub.
- 7** Use the wire included in this kit to connect the new hub with one of the existing hubs or connect the wire directly to the transformer.
- 8** If desired the fixture wires and the hub wires can be shortened.
- 9** When satisfied with the location of the fixture and after the connections are made plug the transformer into the outlet and turn the transformer on.
- 10** Test the system by turning the timer to the on position, make sure the fixtures work correctly.
- 11** Visit the installation after dark to make sure the fixtures are located correctly and adjust as needed, when satisfied return the timer to the preferred setting.
